Chidinma Okwuosa

Junior DevOps Engineer

chidinma.okwuosa@example.net · Lagos, Nigeria

SUMMARY

Two years into my career after a bootcamp and a computer science degree. I support the infrastructure team with deployments, monitoring and documentation, and I am learning cluster operations and infrastructure as code from excellent mentors. I document what I learn on a personal blog, mentor secondary school students in a coding club on weekends, and keep a home lab where I practise cluster failures and recovery.

SKILLS

Docker, Kubernetes basics, Ansible, GitHub Actions, Linux, Bash, Python, Nginx, Prometheus, Grafana, AWS EC2, Git

EXPERIENCE

Junior DevOps Engineer, Eko Fintech Labs 2023 – Present

- Maintain GitHub Actions workflows for five services, adding caching that made builds about 40% faster.
- Help operate a small Kubernetes cluster on a managed cloud service; handle routine upgrades and certificate renewals under supervision.
- Wrote Ansible playbooks to configure Nginx and monitoring agents on 25 virtual machines.
- Keep runbooks current and join the on-call rota as secondary responder.
- Created an onboarding checklist and a glossary for new team members, which cut first-week questions significantly.
- Set up uptime checks and Grafana panels for the customer-facing API and shared the results at the weekly meeting.
- Pair weekly with a senior engineer to review incidents, read logs together and practise safe rollbacks in a staging environment.
- Contribute small fixes to internal tooling, including a script that rotates log files and alerts when disks reach 80% usage.

IT Support Intern, Niger Bridge Telecom 2022 – 2023

- Resolved internal tickets, set up laptops and managed user accounts.
- Automated a weekly disk-usage report with a Bash script that the team now uses every Monday.
- Learned the company's deployment process in three weeks and was trusted with production releases by month five.
- Completed an internal training programme on Linux fundamentals, networking and basic security hygiene, finishing at the top of the cohort.

EDUCATION

- BSc Computer Science, University of Ibadan Heights (2018 – 2022)

LANGUAGES

English (fluent), Igbo (native), Yoruba (conversational)
