Tobias Wenlock-Aird

Platform Engineer

tobias.wenlock-aird@example.com · Leeds, United Kingdom

SUMMARY

Platform engineer with twelve years in infrastructure, the last six building internal developer platforms. I run production Kubernetes clusters on Azure, own the infrastructure as code repositories and keep deployment pipelines boring and reliable. I prefer small, well-documented building blocks that product teams can adopt without asking for help.

SKILLS

Kubernetes, AKS, Bicep, Azure DevOps, ArgoCD, Helm, Prometheus, Grafana, Linux, Bash, Go

EXPERIENCE

Senior Platform Engineer, Harrowgate Retail Systems — 2020 – Present

- Operate 6 Kubernetes clusters on AKS serving 140 microservices, with zero unplanned control plane outages in three years.
- Built a self-service golden path: a team scaffolds a service and gets Bicep modules, Helm chart and pipeline in under 20 minutes.
- Moved release process to GitOps with ArgoCD, cutting average deployment lead time from 2 days to 40 minutes.
- Introduced cost dashboards and node pool right-sizing, saving 31% on monthly cloud spend.

DevOps Engineer, Calderbrook Logistics — 2015 – 2020

- Migrated a fleet of Windows and Linux VMs to containers and a first Kubernetes cluster on-premises.
- Wrote Ansible roles and Jenkins pipelines used by 12 development teams.
- Carried the on-call rota and wrote the incident runbooks the team still uses.

Systems Administrator, Pennine Software Ltd — 2012 – 2015

- Managed Linux servers, backups and monitoring for a 60-person software house.
- Automated server builds with shell scripts and Puppet.

EDUCATION

- BSc Computer Networks, University of Eastmoor (2008 – 2012)

LANGUAGES

English (native), French (A2)

CERTIFICATIONS

- Azure Administrator Associate
- Certified Kubernetes Administrator
