Lukas Brandtner

Senior Software Engineer

lukas.brandtner@example.net · Munich, Germany

SUMMARY

Twelve years in backend development for automotive and industrial software, currently focused on Go microservices that collect vehicle telemetry. Pragmatic, test-first, allergic to over-engineering. I have supervised several thesis students and enjoy explaining embedded constraints to web-minded colleagues. Reliability in the field matters more to me than elegant abstractions.

SKILLS

Go, MQTT, TimescaleDB, gRPC, NATS, Protobuf, TDD, Linux, C++ (legacy), Grafana, SQL, Systems thinking, Technical leadership, Incident response

EXPERIENCE

Senior Software Engineer, Alpenmotor Connected 2019 – Present

- Lead a four-person team building the telemetry ingestion service in Go, 80,000 messages per second, across test benches, prototype vehicles and customer fleets, which required careful versioning of message formats and strict backwards compatibility for older vehicle software.
- Replaced a C++ ingestion daemon, simplifying on-call for the whole team.
- Designed retention and downsampling policies in TimescaleDB, saving 35% storage.
- Review all schema and API changes.
- Introduced replay tooling that lets us reproduce a vehicle's data stream locally, shortening bug analysis from days to hours.

Software Developer, Isarwerk Automation 2013 – 2019

- Wrote C++ and later Go gateways for factory sensors, including long on-site commissioning trips where we debugged protocols directly with electricians and mechanical engineers.
- Implemented an OPC UA bridge.
- Supported customers during commissioning on site.
- Wrote diagnostic dashboards in Grafana for the support team.
- Shared responsibility for 24x7 escalation during the product launch.

Junior Developer, Bavaria Datensysteme 2011 – 2013

- Maintained Java reporting tools.
- Wrote SQL for monthly exports.
- Learned to write fast, safe network code and shared this knowledge in an internal talk.
- Wrote an acceptance test harness simulating one thousand sensors.
- Learned SQL, unit testing and version control habits that I still apply every day.

EDUCATION

- Diplom-Informatiker (FH), Hochschule Oberland (2006 – 2011)
- Certificate in Embedded Linux Development, Bavarian Technical Academy (2012 – 2012)

LANGUAGES

German (native), English (C1)

CERTIFICATIONS

- Professional Scrum Developer course, Scrum training provider
- Functional safety fundamentals workshop for automotive software teams
