Adaeze Nwachukwu

Machine Learning Engineer

adaeze.nwachukwu@example.com · Abuja, Nigeria

SUMMARY

Machine learning engineer building recommendation systems for a media app. Five years of experience including ranking, feature stores and online experimentation. I like measurable product impact. I enjoy mentoring and have given talks about ranking metrics at local meetups. I value clean data, honest A/B test design and clear explanations of what a model can and cannot do.

SKILLS

Recommender systems, Two-tower models, TensorFlow, PyTorch, Feature store, Spark, Python, Online A/B testing, Ranking metrics, Redis, SQL, PySpark

EXPERIENCE

Machine Learning Engineer, Kuvu Media 2021 – Present

- Shipped a two-tower retrieval model that raised daily watch time by 6.5% in an A/B test, and followed up with a holdout analysis to confirm the gain was not a novelty effect.
- Designed feature pipelines and an online feature store with Redis for sub-20 ms reads, which supported both batch training and real-time serving with the same feature definitions.
- Defined ranking metrics (NDCG, coverage) and automated weekly evaluation reports, and published the results in a short report that the whole product team could read.
- Collaborated with product managers to prioritise experiments.
- Mentor two junior engineers and run the weekly paper reading group.

Data Scientist, Harmattan Retail Group 2019 – 2021

- Built a basket-based product recommender with matrix factorisation.
- Deployed batch scoring to the web store.
- Tracked recommendation click-through and conversion, improving the add-to-basket rate by 9%.
- Wrote a data validation layer for incoming event logs.
- Worked closely with the product team to define success metrics before every experiment.

Data Analyst Intern, Lagos Digital Commerce 2018 (6 months)

- Built weekly reports in SQL and Excel for the marketing team.
- Learned Python for data cleaning and exploratory analysis.
- Presented a customer segmentation study.
- Built a dashboard tracking campaign performance and customer segments.
- Cleaned messy sales data from regional offices and documented definitions.

EDUCATION

- BSc Statistics, Federal University of the Niger Plains (2014 – 2018)
