Alejandro Rueda

Junior Java Developer

alejandro.rueda@example.org · Valencia, Spain

SUMMARY

Recent graduate with one year of professional experience in Java and Spring. Enthusiastic about learning clean code, testing and good API design. I am a curious, quick learner who enjoys solving concrete problems. I like working in a team, asking for code reviews and understanding the business behind every task. During my degree I completed a final-year project on a reservation system and I am now looking to grow into a solid backend engineer within a supportive team.

SKILLS

Java, Spring Boot, JPA, MySQL, JUnit, Maven, REST, Git, Thymeleaf, SQL, Debugging, Agile (Scrum), Code review

EXPERIENCE

Junior Java Developer, Turia Servicios Digitales 2025 – Present

- Develop REST endpoints for a municipal permit application, where I learned how real users describe problems differently from developers and how important small, testable increments are for delivering with confidence.
- Wrote unit tests with JUnit and Mockito.
- Fixed bugs reported by internal users.
- Learning from weekly code reviews.
- Added validation rules and error messages for the permit forms, which reduced rejected applications.

Intern, Levante Consulting 2024 – 2025

- Built a small web application using Spring and Thymeleaf, gaining first experience of agile practices, version control workflows and giving short demos to non-technical stakeholders.
- Wrote documentation for the final project.
- Helped migrate data from spreadsheets to MySQL.
- Took part in agile ceremonies and learned to estimate small tasks.
- Worked on a cinema reservation project during my degree, which won an internal prize.

Part-time Developer, Valencia Student Union 2023 – 2024

- Developed a simple event registration site for student societies using Java and MySQL.
- Collected feedback from users and delivered small improvements each month.
- Learned to document features and maintain a project backlog.
- Wrote documentation and short video tutorials for volunteer organisers.
- Learned how to prioritise requests from several student groups.

EDUCATION

- Grado en Ingeniería Informática, Universidad Politécnica del Turia (2020 – 2024)

LANGUAGES

Spanish (native), Valencian (native), English (B2)

CERTIFICATIONS

- Spring Framework online course, completed with certificate
- Java programming fundamentals course, certificate of completion

- Workshop on agile methods and teamwork
