Ananya Venkataraghavan

Analytics Engineer

ananya.venkataraghavan@example.com · Bengaluru, India

SUMMARY

Analytics engineer focused on turning raw event data into clean, tested models. Three years of experience with dbt and a cloud warehouse, working closely with product and finance stakeholders. I care about naming conventions, documentation and fast feedback loops. Outside work I write short internal guides on testing strategies for transformation code and review colleagues' models. I am comfortable working directly with stakeholders and translating vague questions into precise metrics definitions.

SKILLS

dbt, Snowflake, SQL, Python, Fivetran, Looker, Git, Dimensional modelling, Data testing, Airbyte, Jinja, Metabase

EXPERIENCE

Analytics Engineer, Lumenpath Software 2022 – Present

- Own a dbt project of 300+ models; added schema and freshness tests that caught bad loads before dashboards broke.
- Reduced Snowflake spend by 28% through incremental models and clustering review.
- Built a metrics layer so finance and product share one definition of active customer.
- Review pull requests and run a fortnightly modelling clinic.
- Partnered with the growth team to define funnel and retention models used in weekly business reviews.

Junior Data Analyst, Kestrel Insurance Tech 2021 – 2022

- Wrote SQL reports for claims operations.
- Automated weekly spreadsheets with Python scripts, saving about six hours a week.
- Learned the company data stack quickly, shadowing senior engineers and taking over two recurring reports within three months.
- Reconciled revenue figures between billing exports and the warehouse, documenting every difference found.
- Introduced pull request templates and lightweight documentation standards, which improved onboarding for four new colleagues.

Data Analytics Intern, Orchid Retail Labs 2020 (4 months)

- Built SQL queries for sales dashboards and learned version control basics.
- Presented a small churn analysis to the marketing team.
- Cleaned vendor spreadsheets and documented assumptions.
- Built a revenue reconciliation notebook that finance still uses each month-end.
- Collaborated with a senior analyst to rewrite slow Excel models in SQL.

EDUCATION

- BTech Information Technology, Deccan Institute of Technology (2017 – 2021)
