Anjali Raghunathan

Frontend Developer

anjali.raghunathan@example.org · Bengaluru, India

SUMMARY

Three years of experience building responsive interfaces in Vue. I like turning Figma designs into pixel-accurate, reusable components, and I care about clean state management. Looking to grow into a lead role where I can shape component architecture and testing culture. I am comfortable with ambiguity, take feedback well and document what I learn so teammates can reuse it. Weekend hobby: contributing small fixes to Vue ecosystem libraries.

SKILLS

Vue 3, Pinia, JavaScript (ES2022), Tailwind CSS, Vite, Cypress, Figma handoff, REST, Git, Responsive design, Accessibility basics, Component testing

EXPERIENCE

Frontend Developer, Kestrel Fintech Labs 2022 – Present

- Built the customer onboarding flow in Vue 3 with Pinia; completion rate rose from 61% to 74%.
- Created a library of 35 reusable components with Tailwind, documented for the whole team.
- Wrote end-to-end specs in Cypress covering the sign-up and payment screens.
- Collaborated daily with designers to refine spacing, typography and motion.
- Profile slow screens with browser dev tools and lazy load heavy modules, improving first paint by around a third.

Junior Web Developer, Papermill Studio 2021 – 2022

- Implemented landing pages from Figma designs using HTML, CSS and vanilla JavaScript.
- Fixed cross-browser layout bugs in Safari and older Edge versions.
- Learned Vue on the job and migrated two legacy jQuery widgets.
- Wrote a short internal guide on migrating jQuery plugins to Vue components.
- Shadowed senior developers during releases and learned to read production error reports.

Frontend Intern, Bengal Tech Park Startups 2020 – 2021

- Built small features for an internal admin panel using JavaScript, HTML and Bootstrap under supervision.
- Tested layouts on different screen sizes and reported visual glitches to the team lead.
- Presented a final demo of a feedback form to the whole engineering department.
- Added loading and empty states to every screen after noticing users abandoning blank pages.
- Presented demo videos to the team at the end of the internship.

EDUCATION

- B.Tech Information Technology (final-year project: a college events portal built in Vue), Deccan Institute of Engineering (2017 – 2021)
