SKILLS

- Kotlin
- Kotlin Multiplatform
- Jetpack Compose
- Coroutines
- Ktor
- SQLDelight
- Koin
- JUnit
- Mockk
- Gradle convention plugins
- Bitrise
- Retrofit
- Detekt

LANGUAGES

- Polish (native)
- English (C1)

CERTIFICATIONS

- Kotlin Multiplatform Practitioner, Kraków Mobile Meetup workshop
- Android Performance Tuning, online course

EDUCATION

- MSc Computer Science, Kraków University of Technology and Science (2016 – 2018)

SUMMARY

Android engineer with six years of experience, recently working with Kotlin Multiplatform to share business logic with iOS. I like measured refactoring, modular architecture and testable code. I like sharing what I learn with the community, and I speak at Android meetups about multiplatform adoption and architecture trade-offs. I enjoy collaborating with iOS colleagues and product managers.

EXPERIENCE

Android Engineer, Wisła Mobility 2021 – Present

- Share networking and domain code between Android and iOS using Kotlin Multiplatform, saving roughly 35% of feature effort.
- Introduced a modular architecture with Gradle convention plugins; clean build time down from 11 to 6 minutes.
- Built Compose screens for a scooter-rental app with real-time map updates.
- Set up Bitrise builds that run lint, tests and signed releases.
- Mentor two junior engineers and run weekly code reading sessions.

Android Developer, Małopolska Software 2018 – 2021

- Developed Java and Kotlin apps for logistics drivers, including barcode scanning.
- Implemented offline sync with Room and WorkManager.
- Fixed memory leaks that caused crashes on low-end devices.
- Improved barcode scanning speed by 40% by tuning camera configuration and image analysis.
- Worked closely with warehouse staff to understand real device constraints.

Junior Java Developer, Podgórze Systems 2016 – 2018

- Maintained Java backend services and small Android utilities while studying part-time.
- Learned testing, Maven builds and code review.
- Wrote SQL queries and basic reports for internal users.
- Documented architectural decisions and the module graph in short markdown notes for the team.
- Introduced screenshot tests for Compose components, catching layout regressions before review.
