Bartosz Nowaczyk

Principal Backend Engineer

bartosz.nowaczyk@example.com · Warsaw, Poland

SUMMARY

Backend engineer with sixteen years of experience, the last nine mostly in Go. I design high-throughput payment and ledger services, mentor teams on API design and care a lot about observability and boring, maintainable code. I regularly speak at local meetups about Go concurrency pitfalls, and I have reviewed well over two thousand pull requests, which taught me to value small changes and precise commit messages.

SKILLS

Go, gRPC, Protocol Buffers, PostgreSQL, Kafka, Redis, Domain-driven design, Prometheus, OpenTelemetry, Event sourcing, Docker, Distributed systems, Go generics, Chaos testing, Technical leadership

EXPERIENCE

Principal Engineer, Brightledger Payments 2020 – Present

- Designed an event-sourced ledger in Go processing 12,000 transactions per second with p99 latency under 40 ms, working closely with product owners and risk analysts so that every change to settlement rules was agreed, modelled and tested before it went live in any market.
- Led the migration from a PHP monolith to 14 Go services, cutting incident volume by 60%.
- Defined gRPC API guidelines adopted by five squads.
- Mentor six engineers; run the weekly architecture review.
- Introduced contract tests between services, catching 30 breaking changes before they reached staging.

Senior Backend Developer, Nordvik Telecom Systems 2015 – 2020

- Built billing and rating services first in Java, then in Go after a successful pilot, while coordinating the cutover with three external vendors and keeping a written rollback plan for each weekend release.
- Introduced Kafka-based integration between charging and CRM, removing nightly batch jobs.
- Tuned PostgreSQL queries and partitioning for a 3 TB usage table.
- Ran a six-month programme to teach Go to twelve Java developers, with weekly code katas.
- Wrote the internal guide on error handling, retries and idempotency still used by new hires.

Software Developer, Kolarz Software House 2010 – 2015

- Developed Java web applications for logistics clients.
- Wrote integration tests and maintained the build server.
- Shipped REST APIs consumed by mobile apps.
- Contributed to the team's coding standards and led interview panels for two hires.
- Presented a conference talk on lessons learned from the first Go rollout in the company.

EDUCATION

- MSc Computer Science, Warsaw Institute of Applied Informatics (2005 – 2010)

LANGUAGES

Polish (native), English (C1), German (A2)
