Callum Drummond-Reid

Senior Engineering Manager

callum.drummond-reid@example.org · Glasgow, United Kingdom

SUMMARY

Engineering manager who values clear expectations, honest feedback and sustainable pace. Thirteen years in software, nine of them in management, mostly in data-heavy products. Known for turning around struggling teams. Outside work I volunteer as a mentor for graduates changing careers into technology. I prefer plain communication over jargon.

SKILLS

Team turnaround, Performance management, Roadmap delivery, Cross-team dependency management, Risk management, Recruitment, Agile coaching, Python and SQL background, Hands-on code reviews, Capacity planning, Stakeholder communication

EXPERIENCE

Senior Engineering Manager, Clydeside Analytics 2019 – Present

- Manage 14 engineers across data ingestion and reporting products.
- Took over a team with 40% attrition; attrition fell below 8% within 18 months.
- Cut the delivery backlog by a third through a clearer intake process and explicit capacity planning.
- Agree quarterly commitments with product and customer success leaders.
- Run monthly engineering reviews to identify risks early and escalate with options rather than problems. Partner with HR on hiring plans and compensation reviews. Share a monthly written update on progress, risks and hiring.

Engineering Manager, Strathmore Software 2014 – 2019

- Led a team of nine building a customer reporting portal.
- Brought automated testing coverage from 20% to 70%.
- Coached two engineers into their first leadership roles.
- Helped the organisation adopt regular retrospectives and a lightweight incident process.
- Interviewed over 60 candidates and trained others in structured interviewing.

Software Developer, Strathmore Software 2011 – 2014

- Python and SQL development for reporting features.
- Built early reporting dashboards and learned how customers actually used the product.
- Wrote and maintained automated tests and took part in release reviews with the customer support team.
- Pair-programmed with newer colleagues and helped them present their first demos.
- Learned the product domain by sitting with support staff during busy periods.

EDUCATION

- BEng Software Engineering, Glasgow Caledonia University (fictional) (2007 – 2011)

LANGUAGES

English (native), Scottish Gaelic (basic)
