Carmen Idoate

Software Engineer

carmen.idoate@example.net · Bilbao, Spain

SUMMARY

Software engineer with nine years of experience in retail and energy, writing Go for the last five. I favour explicit code, good logging and pragmatic testing; happy to be hands-on in on-call rotations. I like pragmatic engineering: few dependencies, explicit error handling and honest estimates. I co-organise a Go meetup in the Basque Country and have taught a university module on backend development.

SKILLS

Go	PostgreSQL	gRPC
NATS	Redis	Prometheus
Grafana	Wire (DI)	Docker
Bash	SQL	OpenAPI
Feature flags	Technical writing	Code review

EXPERIENCE

Period	Position	Responsibilities
2021 – Present	**Software Engineer** Ibaizabal Energía Digital	• Built meter-reading ingestion services in Go processing 4 million readings an hour, and I regularly speak with the operations team to understand how readings arrive in practice, which helped us catch malformed data long before it reached billing. • Replaced polling with NATS subscriptions, reducing load on the database by half. • Deployed services via the platform team's k8s templates; I only edit the service manifests. • Participate in on-call and write post-incident reviews. • Created a replay tool that reprocesses stored readings after bug fixes, avoiding manual corrections and customer disputes.
2017 – 2021	**Backend Developer** Kantabria Retail Group	• Developed stock APIs in Java and later Go, where the team was small, so I took on design, implementation, testing and support for the stock services. • Added caching that sped up catalogue pages by 3x. • Mentored two interns. • Implemented rate-limited public APIs for franchise partners. • Introduced feature flags for gradual rollouts, which prevented a failed release reaching all stores.
2015 – 2017	**Junior Developer** Euskadi Soluciones	• Maintained PHP intranet applications. • Supported a larger team by fixing bugs and writing small features in Java. • Learned code review, branching strategies and release routines. • Learned version control, code review and basic testing from a patient team lead. • Helped customers by phone when intranet pages failed, which taught me to listen first.

EDUCATION

2011 – 2015	Grado en Ingeniería Informática	Universidad Técnica del Cantábrico

LANGUAGES

Spanish (native), Basque (B2), English (C1)
