Ciaran Mulvaney-Roche

Senior Frontend Engineer

ciaran.mulvaney@example.com · Dublin, Ireland

SUMMARY

Frontend engineer with twelve years building data-heavy web applications. I specialise in React and TypeScript, design systems and performance work, and I enjoy mentoring junior developers. My recent focus has been cutting bundle sizes and making dashboards accessible to everyone, including keyboard and screen reader users. Outside work I contribute to open-source accessibility tooling and speak at local meetups about practical performance budgets for product teams.

SKILLS

React, TypeScript, Next.js, Redux Toolkit, Storybook, Webpack, Vite, Jest, Playwright, WCAG 2.2, Web performance, GraphQL

EXPERIENCE

Senior Frontend Engineer, Lantern Analytics 2020 – Present

- Led migration of a 400-component dashboard from class components to hooks, cutting render time by 38%.
- Introduced route-level code splitting that reduced initial JavaScript from 1.4 MB to 520 KB.
- Built the internal design system in Storybook, now used by six product squads.
- Mentored four junior engineers through code review and pairing sessions.
- Partner with product managers to define performance budgets that are checked on every merge request and reported weekly.

Frontend Developer, Brackenfield Digital 2016 – 2020

- Delivered single-page apps for retail clients using React, Redux and REST APIs.
- Raised Lighthouse accessibility scores from 62 to 96 across the flagship storefront.
- Wrote unit and integration tests with Jest and React Testing Library.
- Mentored two graduates who later became full-time engineers on the team.
- Built reusable data-table and chart components adopted across three client projects.

Web Developer, Corncrake Media 2013 – 2016

- Built marketing sites with jQuery, Sass and responsive layouts.
- Maintained a custom CMS theme layer for twenty regional newspapers.
- Introduced Sass partials and a living style guide that cut duplicated CSS across the regional news sites.
- Handled day-to-day browser compatibility fixes for Internet Explorer 9 and early mobile Safari.

EDUCATION

- BSc Computer Science, University of Westmarch (2009 – 2013)

LANGUAGES

English (native), Irish (conversational)

CERTIFICATIONS

- Web Accessibility Specialist (IAAP-style course)
