# Declan Fairweather-Boyle

QA Engineer

declan.fairweather@example.org · Belfast, United Kingdom

## SUMMARY

QA engineer, four years in, automating web and API tests for a SaaS product. I enjoy exploratory testing as much as scripting, and I write clear bug reports that developers actually act on. I am collaborative, methodical and happiest when a bug report I wrote leads to a quick fix. I am studying for my next ISTQB certificate in my own time. I welcome honest feedback and like small teams.

## SKILLS

Cypress, JavaScript, Postman, Newman, GitHub Actions, Exploratory testing, Jira, TestRail, Basic SQL, Accessibility checks, Bug reporting, Cross-browser testing, Test case design, API testing, Agile, Defect triage, Test planning

## EXPERIENCE

**QA Engineer**, Lagan Software 2021 – Present

- Wrote 220 Cypress tests covering core user journeys.
- Run Postman collections through Newman on every pull request using GitHub Actions.
- Facilitate bug-bash sessions before each release.
- Maintain test data setup scripts in JavaScript.
- Suggest acceptance criteria during refinement so that edge cases are discussed before development starts.

**Junior QA Tester**, Foyle Digital 2020 – 2021

- Executed manual test plans for a mobile banking web app.
- Logged and triaged around 300 defects in Jira.
- Learned Cypress and automated the top ten smoke checks.
- Investigated a recurring payment failure and traced it to a timezone bug, saving several support hours a week.
- Built a small tool to compare API responses across environments.

**Support Technician**, Antrim IT Services 2018 – 2020

- Resolved hardware and software tickets for small businesses and learned to reproduce faults systematically.
- Wrote simple scripts to automate repetitive set-up tasks for new laptops.
- Kept a knowledge base that cut repeat questions from clients.
- Tested on laptops, tablets and phones, noting layout and input issues for each browser.
- Took notes in daily stand-ups and followed up on open defects until closure.

## EDUCATION

- BSc Software Engineering (final project: a student timetable application), Ulster Glens University (2016 – 2020)

## LANGUAGES

English (native)

## CERTIFICATIONS

- ISTQB Foundation Level

- Cypress official training course
