Declan Fitzmaurice

Forecasting Data Scientist

declan.fitzmaurice@example.com · Dublin, Ireland

SUMMARY

I build demand and load forecasts for energy and utilities. Over eleven years I have moved from spreadsheets and R scripts to probabilistic models in production. Plain-spoken about uncertainty. I like clear communication, reproducible analysis and a good code review. I enjoy mentoring early-career analysts and translating statistical caveats into decisions that business leaders can use.

SKILLS

R	Python	Probabilistic forecasting
Statsmodels	LightGBM	Hierarchical models
Stan	SQL	Quantile regression
Shiny	Prophet	

EXPERIENCE

Period	Position	Responsibilities
2018 – Present	**Principal Data Scientist** Emerald Grid Analytics	• Own the national day-ahead load forecast; error improved from 3.4% to 2.6% MAPE, and published weekly accuracy tables so that the trading desk could see when to trust the numbers. • Introduced quantile forecasts so traders can size risk explicitly, which let analysts rerun history after any code change and spot unintended regressions. • Mentor three data scientists and review all modelling changes, and trained the operations team to read prediction intervals rather than single point values. • Built a backtesting framework that replays five years of data to compare candidate models fairly. • Collaborate with the engineering team to put models into scheduled production jobs with automatic quality checks.
2013 – 2018	**Statistician** Liffey Water Authority	• Modelled consumption and leak probability with generalised additive models. • Published internal method notes. • Wrote an internal handbook on forecasting methods for non-specialists. • Reported monthly forecast accuracy to senior engineers and executives. • Developed demand models for customer billing, replacing a manual spreadsheet process.
2011 – 2013	**Research Assistant** Eastern Atlantic University	• Ran survey analysis in R. • Presented findings at a regional statistics conference. • Taught undergraduate tutorials on time series. • Created a shared R package for common data cleaning tasks, used by the whole department.

EDUCATION

2009 – 2011	MSc Statistics	Eastern Atlantic University
