Elias Haraldsen

Backend Developer

elias.haraldsen@example.net · Oslo, Norway

SUMMARY

Backend developer building Go APIs for a municipal booking platform. Four years of experience. Interested in clean architecture and in learning more about modern infrastructure and cloud topics. In my spare time I contribute small fixes to open-source Go libraries and follow talks on cloud technology to widen my horizon. My day-to-day work is application code and its tests.

SKILLS

Go, REST, PostgreSQL, Gorilla Mux, Unit testing, Docker, Kubernetes, Terraform, CI/CD, AWS, Azure, Jenkins, Ansible, Helm, Prometheus, Grafana, ArgoCD, Istio, Vault, Linux, Communication, Agile (Scrum), Technical documentation

EXPERIENCE

Backend Developer, Fjordkommune IT 2022 – Present

- Develop and maintain booking and payment APIs in Go for 40 municipalities, discussing edge cases for municipal rules such as holiday closures and age restrictions with caseworkers, and then turning them into clear test scenarios.
- Wrote the audit-log module and its unit tests.
- Attended a one-day Kubernetes and Terraform workshop; the infrastructure team handles all cloud setup, and I am familiar with CI/CD concepts only.
- Support the helpdesk with application-level bug fixing.
- Collaborate with product owners to refine requirements and estimate tasks for each two-week sprint.

Junior Developer, Nordlys Webbyrå 2020 – 2022

- Built Go and JavaScript features for client web shops, including a rewrite of the notification module that needed careful handling of Norwegian characters and time zones.
- Fixed bugs and wrote SQL for reports.
- Took part in daily stand-ups and sprint planning.
- Delivered a customer-facing booking widget backend within a tight deadline for a regional festival.
- Handled day-to-day questions from clients and documented the answers in a shared knowledge base.

Student Assistant, Oslo University College IT Office 2018 – 2020

- Supported lecturers with classroom equipment and software installs.
- Created small scripts in Python to generate student lists.
- Answered helpdesk tickets from staff and students.
- Learned basic Python scripting and kept a tidy spreadsheet of recurring tickets.
- Developed the habit of documenting solutions for the next person on shift.

EDUCATION

- BSc Informatics, Oslo Metropolitan College of Technology (2016 – 2020)

LANGUAGES

Norwegian (native), English (C1)
