Emeka Nwankwo-Lindqvist

Site Reliability Engineer

emeka.nwankwo-lindqvist@example.net · Stockholm, Sweden

SUMMARY

SRE with ten years of experience across Nigeria and Sweden. I focus on resilience, capacity planning and incident response for payment systems. Kubernetes and Terraform are daily tools; I write most of my automation in Go. I am comfortable with Swedish and English documentation and bridge teams across Nigeria and Sweden, and I enjoy sharing lessons about resilient payment systems at industry meetups.

SKILLS

Kubernetes	Terraform	CI/CD
Go	Prometheus	Grafana
Jaeger	Kafka operations	AWS
PostgreSQL	Linux	Incident command

EXPERIENCE

Period	Position	Responsibilities
2019 – Present	**Site Reliability Engineer** Nordlys Pay AB	• Own reliability of the card authorisation path handling 1,500 transactions per second. • Operate Kubernetes clusters in two regions with Terraform-managed networking and node groups. • Maintain CI/CD pipelines with progressive delivery and automatic rollback. • Led 30 incident reviews and drove the action items to closure. • Introduced chaos drills against the authorisation path to prove failover works before peak season. • Wrote capacity forecasts based on seasonal traffic; Black Friday ran without manual intervention for the first time. • Define and track service level objectives with product owners, and report monthly on reliability, latency and error budgets. • Coordinate with the security team on certificate rotation, key management and audit evidence for payment standards.
2015 – 2019	**DevOps Engineer** Lagoon Commerce Ltd	• Automated deployment of e-commerce services and monitoring. • Introduced centralised logging with the ELK stack. • Wrote a Go service that reconciled payment status across providers. • Implemented distributed tracing across 40 services to find latency hotspots. • Trained support analysts to read dashboards and triage alerts. • Maintained Linux hosts, load balancers and database replicas, and handled capacity requests during shopping peaks.
2013 – 2015	**Network and Systems Engineer** Delta Connect Nigeria	• Administered Linux servers and branch networks for an ISP. • Learned about operating in constrained networks, which shaped my interest in resilience.

EDUCATION

2008 – 2012	BEng Computer Engineering	University of Port Harcourt Federal

LANGUAGES

English (fluent), Swedish (B2), Igbo (native)

CERTIFICATIONS

- Certified Kubernetes Application Developer
