- Agile delivery

LANGUAGES

- English (native)
- Hausa (conversational)

EDUCATION

- BSc Statistics, University of Abuja Plateau (fictional) (2015 – 2019)

SUMMARY

Business analyst working at the border between business and data. Four years in telecoms, specialising in reporting needs, KPIs and data quality. I translate what managers say they want into what the data can really show. I am studying for a data analytics certificate and want to grow into a data product role. I document carefully and challenge assumptions politely.

EXPERIENCE

Business Analyst, Data, Sahel Mobile Networks 2022 – Present

- Define and document 60 KPIs for the commercial team and agree calculation rules with finance.
- Wrote SQL to reconcile billing and usage data, finding about 2% revenue leakage.
- Built Power BI reports for regional sales managers in four states.
- Gather requirements for a new customer self-service portal.
- Created a data dictionary and data quality checklist adopted by the BI team. Meet weekly with regional managers to refine dashboard requirements. Present data findings to the commercial director each quarter with clear recommendations and caveats.

Junior Business Analyst, Abuja Digital Solutions 2020 – 2022

- Documented processes and requirements for a mobile money project.
- Supported UAT cycles and logged defects.
- Helped train 50 field agents on the new mobile money app.
- Wrote test scripts and tracked defects to closure with developers.
- Mapped the mobile money onboarding journey and proposed three changes that reduced rejected registrations.

Data Entry and Reporting Clerk, Garki Commercial Bank (fictional) 2019 – 2020

- Reconciled daily transaction reports and flagged inconsistencies to the supervisor.
- Learned SQL and Excel automation to replace manual report preparation.
- Prepared training notes for new clerks on reporting standards.
