Ewan Mackillop

Data Engineer

ewan.mackillop@example.com · Glasgow, United Kingdom

SUMMARY

Pragmatic data engineer. Python, SQL, Postgres. Small team, short feedback loops. I document everything, keep dependencies minimal and favour boring tools that stay running for years. Short feedback loops matter more to me than fashionable stacks. I am steady under pressure and happy to take on unglamorous work, such as backfills, data fixes and documentation.

SKILLS

Python, SQL, PostgreSQL, Luigi, Redshift, Docker, Metabase, Bash, REST APIs, Cron, Excel macros

EXPERIENCE

Data Engineer, Thistle Mobility 2018 – Present

- Own nightly loads from six partner APIs into Postgres, which gave analysts a dependable morning dataset and let me retire three brittle shell scripts for good.
- Wrote Metabase models for the ops team, with the retry logic and run history stored in Postgres so anyone on the team can audit a failed night.
- Handled vendor file format changes and backfills, and wrote a one-page guide for the support desk explaining which dashboards were safe to trust.
- Documented every job in the team wiki.
- Cut the overnight load window from three hours to forty minutes by loading in parallel and tuning indexes.

ETL Developer, Clydeside Utilities 2015 – 2018

- Maintained SQL Server Integration Services packages.
- Moved reports from Excel macros to scheduled SQL.
- Supported month-end close runs.
- Rewrote slow stored procedures for cost reports and added basic unit tests.
- Trained two colleagues on SQL window functions and query plans.

Support Analyst, Forth Valley Software 2012 – 2015

- Resolved customer queries about reporting software and logged defects.
- Wrote small SQL scripts to diagnose data problems.
- Learned the basics of database administration.
- Maintained scheduled loads for the finance data mart and chased missing source files each month-end.
- Replaced fragile manual imports with validated, repeatable scripts.

EDUCATION

- BSc Software Engineering, Strathmore Highlands University (2011 – 2015)

LANGUAGES

English (native), Scottish Gaelic (A2)
