Folasade Adeyemi-Cross

Frontend Engineer, Accessibility

folasade.adeyemi@example.com · Manchester, United Kingdom

SUMMARY

I build inclusive interfaces for public-sector and healthcare products. Six years with React, semantic HTML and assistive technology testing. I audit existing sites, fix the root causes, and train teams so accessibility stays part of every sprint rather than an afterthought. I also volunteer as a mentor for women entering tech and write a blog about accessibility fixes that cost little but help many users every single day.

SKILLS

React	Semantic HTML	ARIA
NVDA	VoiceOver	axe-core
TypeScript	CSS Grid	Gatsby
Jest	User research support	Inclusive design reviews
Colour contrast tooling	Plain language	

EXPERIENCE

Period	Position	Responsibilities
2021 – Present	**Frontend Engineer** Calder Health Digital	• Remediated 140 WCAG failures in the patient portal ahead of a regulatory audit. • Built accessible form components with proper focus management and error announcements. • Delivered a half-day accessibility workshop to forty colleagues. • Paired with researchers to test prototypes with screen reader users. • Maintain an internal checklist for developers, designers and content writers covering colour contrast, headings and keyboard order.
2018 – 2021	**Web Developer** Marlowe Civic Tech	• Developed council service pages in Gatsby and React. • Introduced automated axe checks into the pull request process. • Reduced page weight by 55% through image optimisation and lazy loading. • Tested every council form with keyboard-only navigation and high-contrast mode before release. • Presented findings to non-technical managers using short recordings of real assistive technology use.
2017 – 2018	**Junior Developer** Pennine Web Cooperative	• Maintained HTML and CSS for charity websites and fixed layout issues reported by volunteers. • Added alternative text and heading structure to around two hundred legacy pages. • Learned the basics of JavaScript while supporting a small community newsletter tool. • Collaborated with a designer to simplify layouts for visitors using older phones and slow connections. • Reported colour contrast failures to the charity's brand team with concrete replacement values.

EDUCATION

2014 – 2017	BA Digital Media (dissertation on accessible interfaces for older adults)	University of Northern Pennine

LANGUAGES

English (native), Yoruba (conversational)

CERTIFICATIONS

- Certified Professional in Accessibility Core Competencies
