Gareth Penhaligon

Cloud Engineer

gareth.penhaligon@example.org · Bristol, United Kingdom

SUMMARY

Cloud engineer in my third year, working on Terraform and Kubernetes for a small agency. I enjoy learning, writing things down and pairing with senior colleagues. Currently studying for the CKA. I am quick to ask for help, keen to take on on-call responsibilities as I grow, and I run a small home lab where I rebuild clusters from scratch every few weekends to practise recovery.

SKILLS

Terraform, Kubernetes, CI/CD, AWS, Docker, GitLab, Bash, Python, Nginx, Grafana

EXPERIENCE

Cloud Engineer, Severn Digital Agency 2023 – Present

- Manage AWS accounts for 12 client websites with Terraform modules I helped create.
- Deploy client applications to a shared Kubernetes cluster and handle routine upgrades.
- Maintain CI/CD pipelines in GitLab, including preview environments for every merge request.
- Produce monthly uptime and cost summaries for account managers.
- Wrote documentation and short screencasts so account managers can request new environments without engineering help.
- Added automated TLS certificate renewals and expiry alerts, eliminating certificate incidents.
- Review upgrade notes for new versions before every change, and test upgrades in a copy of the cluster before touching production.
- Collaborate with front-end developers to speed up deployments of static sites using cached builds and a content delivery network.
- Keep a personal learning log and share one new technique with the team every fortnight.
- Support a small team of three developers and one designer, joining stand-ups and helping estimate infrastructure work.

Support Engineer, Avon Web Hosting 2022 – 2023

- Answered hosting tickets, restored backups and debugged slow WordPress sites.
- Wrote shell scripts for repetitive customer requests.
- Helped migrate three WordPress clients to containers with managed databases.
- Wrote clear, step-by-step answers for customers and learned to prioritise urgent incidents calmly.
- Took part in weekend maintenance work with senior colleagues and practised safe rollbacks.

EDUCATION

- BSc Computer Science, University of Westbridge (2019 – 2022)

LANGUAGES

English (native)

CERTIFICATIONS

- AWS Certified Cloud Practitioner
