Hanna Lindqvist-Okoro

PostgreSQL Database Engineer

hanna.okoro@example.com · Gothenburg, Sweden

SUMMARY

PostgreSQL specialist with nine years of experience. I focus on query performance, replication and safe schema changes for busy transactional systems. Comfortable reading execution plans at two in the morning. I like clear runbooks, careful capacity planning and working side by side with application developers. I mentor developers on how databases work, and I enjoy turning incident lessons into simple checklists.

SKILLS

PostgreSQL, Patroni, pgBackRest, Streaming replication, EXPLAIN ANALYZE, Partitioning, pgBouncer, Logical replication, Monitoring with Prometheus, Bash, Python, Ansible

EXPERIENCE

Database Engineer, Skarpa Booking Systems 2019 – Present

- Run a 4 TB PostgreSQL estate with Patroni high availability and automated failover, which brought the busiest reporting queries well inside the agreed service levels.
- Cut p95 query latency by 60% through index redesign and table partitioning, and rehearsed failover with the operations team every quarter, noting every surprise in the runbook.
- Planned zero-downtime major version upgrades using logical replication, using canary rollouts and clear communication with the application teams affected.
- Mentor developers on safe migrations and locking behaviour.
- Built Grafana dashboards for replication lag, bloat and slow queries to catch problems early.

Database Administrator, Västra Energi 2014 – 2019

- Administered PostgreSQL and MySQL instances.
- Introduced pgBackRest with point-in-time recovery.
- Planned capacity growth and presented storage forecasts to management each year.
- Migrated a reporting database from MySQL to PostgreSQL with minimal downtime.
- Documented a restore procedure and rehearsed it twice a year with the operations team.

Junior Database Technician, Älvsborg Public Services 2012 – 2014

- Monitored database servers and handled user requests.
- Wrote scripts for backup verification.
- Learned SQL optimisation under a senior administrator.
- Created a monitoring script that alerted on long running transactions.
- Worked with a supplier on a database upgrade project.

EDUCATION

- MSc Information Systems, Gothenburg Coastal University (2012 – 2014)
