Hannelore Brüggemann

Full-Stack Engineer (Elixir / LiveView)

hannelore.bruggemann@example.net · Leipzig, Germany

SUMMARY

Full-stack engineer with nine years of experience building real-time collaboration tools. I favour functional languages, small teams and clear domain boundaries, and I enjoy explaining technical trade-offs to non-technical colleagues. I write blog posts on concurrency, speak at regional functional programming meetups and mentor people moving into Elixir from other stacks. I like collaborating closely with designers and product managers.

SKILLS

Elixir, Phoenix LiveView, Ecto, PostgreSQL, JavaScript, Alpine.js, WebSockets, ExUnit, Docker, Fly.io, Oban, Phoenix Channels

EXPERIENCE

Senior Engineer, Elbe Collaboration AG — 2019 – Present

- Built a real-time whiteboard with Phoenix LiveView supporting 2,000 concurrent sessions per node.
- Designed presence and conflict-resolution logic using CRDT-inspired structures.
- Replaced a legacy Rails admin with LiveView screens, delivering in half the estimated time.
- Run weekly Elixir study sessions for the engineering department.
- Mentor two engineers and organise the quarterly internal hackathon.

Software Developer, Saxonia Systems — 2015 – 2019

- Developed Rails and JavaScript applications for insurance clients.
- Introduced Ecto-based services for high-volume event processing.
- Maintained the build and deployment scripts on Docker.
- Wrote property-based tests that found several ordering bugs before release.
- Worked closely with product designers on interaction prototypes.

Junior Web Developer, Pleiße Medien — 2012 – 2015

- Built PHP and JavaScript websites for regional media customers while finishing my degree.
- Learned database design, Git workflows and client communication.
- Created a small CMS plugin used by twelve newsrooms.
- Wrote internal documentation and decision records that explain the supervision and failure strategy of the real-time layer.
- Interviewed candidates and designed the take-home exercise for the team.

EDUCATION

- Diplom Informatik, University of Applied Sciences Leipzig East (2010 – 2015)

LANGUAGES

German (native), English (C2), Polish (A2)

CERTIFICATIONS

- Functional Programming in Practice, Leipzig Developer Academy

- Elixir Performance Workshop
