Hildegard Vanterpool

QA Engineer

hildegard.vanterpool@example.net · Rotterdam, Netherlands

SUMMARY

QA engineer of nine years focused on manual and exploratory testing of web forms and reporting tools. I also maintain a small set of Selenium checks. I like understanding how the whole delivery process fits together, from requirements through to release. Outside work I run a hobby blog about testing heuristics and enjoy puzzle-solving, which suits finding the odd corner cases in reports.

SKILLS

Manual testing, Exploratory testing, Test case design, Selenium IDE, Postman, Jira, TestRail, SQL, Docker, Kubernetes, Terraform, CI/CD, Jenkins, AWS, Azure, Agile, DevOps culture, Regression testing, Bug reporting, Test planning, Excel

EXPERIENCE

QA Engineer, Maasland Reporting Software 2018 – Present

- Write and execute test plans for a financial reporting product with 60 report types.
- Maintain around 40 Selenium IDE recordings for smoke checks.
- Our platform team uses Kubernetes and Terraform with CI/CD, which I have read about to follow their release notes.
- Triage defects with developers and verify fixes in staging.
- Document test coverage by report type so product owners see risks before every release.

Test Analyst, Delta Insurance IT 2014 – 2018

- Prepared test data and executed regression suites by hand.
- Reported 500 defects with clear reproduction steps.
- Helped introduce TestRail to replace spreadsheet tracking.
- Created a test data catalogue shared by the three QA engineers.
- Helped define release checklists that reduced late-found defects by around a quarter.

Support Analyst, Rijn Helpdesk Services 2012 – 2014

- Handled customer tickets and escalated software faults.
- Learned to read logs and database records to help developers pinpoint faults.
- Handled around 40 tickets a week with a high customer satisfaction score.
- Documented known issues and workarounds on the shared support wiki.
- Learned the basics of the product's data model so I could explain faults to developers.

EDUCATION

- BSc Information Management (thesis on usability of business software), Hogeschool Noordwijk (2008 – 2012)

LANGUAGES

Dutch (native), English (C1), German (B1)

CERTIFICATIONS

- ISTQB Foundation Level

- Agile testing short course
