Isabela Cordeiro Rangel

Applied Scientist

isabela.rangel@example.com · Rio de Janeiro, Brazil

SUMMARY

Applied scientist in credit risk. I build scorecards and gradient boosted models, then fight to get them explained, approved and monitored. Seven years in lending. I like working closely with the risk and legal teams and explaining models to people without a technical background. I value transparent models, good documentation and constant dialogue with the business.

SKILLS

Credit scoring, XGBoost, Logistic regression, SHAP, Python, SQL, Model monitoring, Survival analysis, Scorecards, Population stability index, Python

EXPERIENCE

Applied Scientist, Carioca Credit Bank 2019 – Present

- Rebuilt the consumer default model, raising Gini from 0.52 to 0.61, which the model risk committee praised for the clarity of its documentation and validation tests.
- Created SHAP-based explanations accepted by the regulator's model review, which the model risk committee reviews monthly with the whole team.
- Set up monthly stability and drift monitoring for 14 production models, and agreed the alert thresholds with business owners so that alarms were actionable.
- Partnered with compliance to document model assumptions, limitations and validation outcomes for audits.
- Mentor two analysts and review their notebooks.

Credit Analyst, Guanabara Financeira 2016 – 2019

- Built scorecards in SAS then Python.
- Analysed portfolio performance by vintage.
- Reduced manual credit review volume by 25% through an automatic pre-screening score.
- Trained junior colleagues in SQL and basic statistics.
- Prepared quarterly portfolio reviews for senior managers and highlighted emerging risk segments.

Estagiária de Estatística, Instituto de Pesquisa Fluminense 2014 – 2015

- Analysed survey data in R and prepared weekly reports.
- Learned data cleaning and sampling methods.
- Presented results to senior researchers.
- Learned model governance procedures and helped prepare validation reports.
- Collaborated with the collections team to prioritise contacts using simple scores.

EDUCATION

- MSc Statistics, Bahia State University (2014 – 2016)
