Joachim Hartwig-Nowak

Test Automation Architect

joachim.hartwig@example.net · Hamburg, Germany

SUMMARY

Fourteen years in quality engineering across automotive and logistics. I define automation strategy, choose tools, and build frameworks that run unattended in release pipelines. Deeply interested in test design techniques, model-based testing and metrics that reflect real risk. I publish talks on test design and give internal training on automation patterns. Colleagues know me for structured thinking and dry humour.

SKILLS

Python, pytest, Robot Framework, Selenium Grid, Appium, Model-based testing, GitLab CI, Docker Compose, Grafana dashboards, Mutation testing, Test strategy, Requirements review, Test metrics, Exploratory testing

EXPERIENCE

Test Automation Architect, Elbe Logistik Software 2018 – Present

- Defined a company-wide automation strategy and test pyramid adopted by nine teams.
- Built a pytest framework with parallel execution on Selenium Grid and Docker Compose.
- Introduced mutation testing to evaluate unit test quality.
- Created dashboards showing escaped defects and test stability per release.
- Chair the testing guild and run quarterly workshops on test design and flakiness analysis.

Senior QA Engineer, Autoteil Systeme 2012 – 2018

- Automated hardware-in-the-loop checks for infotainment units with Robot Framework.
- Developed Appium tests for the companion mobile app.
- Integrated nightly regression runs into GitLab pipelines.
- Reduced regression execution time by 60% through selective test running based on changed modules.
- Mentored four engineers who later became team leads.

Test Analyst, Hansa Prüftechnik 2010 – 2012

- Designed test cases from requirements using equivalence classes and boundary analysis.
- Learned requirements analysis and test case design in a rigorous safety-critical environment.
- Wrote documentation for test procedures audited by an external certifier.
- Designed test cases using equivalence classes, boundary values and decision tables for warehouse management software.
- Reviewed requirements with engineers and flagged ambiguous or contradicting statements before coding.

EDUCATION

- Diplom-Informatiker (thesis on test case generation from state machine models), Technische Hochschule Nordmark (2004 – 2010)

LANGUAGES

German (native), English (C1)

CERTIFICATIONS

- ISTQB Test Manager

- Safety-critical software testing seminar
