SKILLS

- Apache Spark
- PySpark
- Airflow
- Delta Lake
- Kafka
- Scala
- Python
- SQL
- Parquet
- Data modelling
- Great Expectations
- AWS Glue
- S3

LANGUAGES

- Polish (native)
- English (C1)
- German (B1)

CERTIFICATIONS

- Databricks Certified Data Engineer Professional

EDUCATION

- MSc Computer Science, Pomorze Technical University (2009 – 2014)

SUMMARY

Data engineer with twelve years of experience building batch and streaming platforms for retail and logistics. I design lakehouse layouts, own data quality contracts and mentor junior colleagues. Happiest when a messy source system becomes a trusted, documented dataset that analysts actually use. I also enjoy writing design documents and running blameless post-incident reviews for data outages. My career began in software development, which still shapes how I write maintainable pipeline code and clear tests.

EXPERIENCE

Senior Data Engineer, Baltivo Logistics 2019 – Present

- Rebuilt the nightly warehouse load on Spark and Delta Lake, cutting runtime from 7 hours to 55 minutes.
- Introduced data contracts and Great Expectations checks; incident count on core tables dropped by 70%.
- Led a team of four engineers and ran the on-call rota for the ingestion layer.
- Migrated 140 legacy cron-based ETL scripts into Airflow DAGs with retries and alerting.
- Standardised Parquet file sizing and partition pruning rules, which halved scan costs on the largest fact tables.

Data Engineer, Nordgate Retail Systems 2014 – 2019

- Wrote Scala jobs that aggregated 2 TB of daily till transactions into sales marts.
- Replaced a hand-maintained Hadoop cluster with managed Spark on cloud storage.
- Supported analysts with ad hoc SQL and dimensional models.
- Presented quarterly roadmap updates to the head of analytics and the logistics operations directors.
- Supported analysts during peak season, scaling ingestion jobs for promotion weeks without any missed deadlines.

Junior Developer, Gdynia Software Works 2011 – 2014

- Developed reporting back ends in Java and PostgreSQL for freight customers.
- Wrote nightly SQL jobs and fixed performance problems reported by users.
- Learned version control and code review discipline from a strong senior team.
- Improved query response times for customer portals by adding indexes and rewriting slow joins.
- Joined weekly code reviews and wrote the team's first coding standard document.
