Kavitha Subramaniam

Infrastructure Engineer

kavitha.subramaniam@example.com · Singapore

SUMMARY

Infrastructure engineer, eleven years, specialising in reliable hybrid environments for financial services. I work with Terraform, Kubernetes and Jenkins CI/CD, and I am happiest when change is boring. I lead by writing things down, running blameless reviews and keeping change small, and I have mentored a number of junior engineers who have since moved into cloud roles at other firms.

SKILLS

Terraform, Kubernetes, CI/CD, Jenkins, VMware, Ansible, AWS, Vault, Splunk, Python, Linux, ITIL

EXPERIENCE

Senior Infrastructure Engineer, Merlion Capital Partners 2018 – Present

- Lead a team of five running hybrid infrastructure across two data centres and AWS.
- Codify networks, security groups and clusters in Terraform with peer-reviewed plans.
- Operate on-premises Kubernetes for trading analytics; capacity planning keeps utilisation at 70%.
- Standardise CI/CD on Jenkins with approval gates required for regulated systems.
- Reduced unplanned outages by 40% over three years through patch automation, capacity reviews and failover testing.
- Documented infrastructure standards used as the basis for the firm's regulatory resilience submissions.
- Chair the weekly change advisory meeting and review risks, rollback plans and test evidence for each submitted change.
- Coordinate capacity planning with business units twice a year using utilisation trends and growth forecasts.

Infrastructure Engineer, Raffles Data Centre Services 2013 – 2018

- Managed VMware and storage for 300 hosts.
- Introduced Ansible for patching and compliance checks.
- Handled incident escalations on a 24x7 rota.
- Planned and executed a data centre exit for two environments over a single weekend.
- Reviewed vendor contracts and negotiated better support terms.
- Maintained detailed runbooks for storage, network and virtualisation failures, and ran incident drills with the operations team.

Systems Analyst, Orchard Logistics Pte 2011 – 2013

- Supported ERP servers and database backups.
- Learned a great deal about change control in regulated settings.

EDUCATION

- BSc Information Technology, Nanyang Coastal University (2007 – 2011)

LANGUAGES

English (fluent), Tamil (native), Mandarin (basic)

CERTIFICATIONS

- Certified Kubernetes Administrator
