Kwabena Osei-Lindgren

Frontend Architect

CONTACT

kwabena.osei@example.com
Gothenburg, Sweden

SKILLS

- React
- Remix
- TypeScript
- Rendering strategies (SSR, ISR, CSR)
- Turborepo
- esbuild
- Playwright
- Design tokens
- Bundle analysis
- OpenTelemetry for browsers
- Web Vitals
- Architecture decision records
- Browser internals
- Technical mentoring

LANGUAGES

- English (fluent)
- Swedish (C1)
- Twi (native)

CERTIFICATIONS

- Advanced web performance training course

EDUCATION

- MSc Interaction Design (thesis on responsive interfaces for in-car displays), Gothenburg Institute of Technology (2006 – 2008)

SUMMARY

Frontend architect with sixteen years of experience, from jQuery spaghetti to modern component platforms. I design rendering strategies, standardise tooling and advise teams on frameworks. Achievement-driven, data-minded, and happiest when a migration lands without anyone noticing. I write architecture decision records, run brown-bag talks and mentor tech leads. Away from work I contribute to open-source bundler plugins.

EXPERIENCE

Frontend Architect, Nordkust Mobility 2018 – Present

- Defined a rendering and caching strategy that improved LCP by 41% on the booking flow.
- Consolidated eleven repositories into one Turborepo, halving build times.
- Created design tokens synced between Figma and code.
- Coach tech leads on state management and testing pyramids.
- Present quarterly frontend health reports covering bundle size, error rates and web vitals to engineering leadership.

Senior Frontend Developer, Älvdal Media 2012 – 2018

- Built streaming-video player interfaces for connected TVs and browsers.
- Moved the team from Backbone to React and ES modules.
- Established visual regression testing.
- Led hiring for six frontend roles and designed the technical assessment.
- Set up error tracking and source map handling so production issues map to the right component and owner.

Web Developer, Fjällbacka Interactive 2008 – 2012

- Delivered JavaScript widgets and Flash replacement projects.
- Introduced Git branching rules and automated linting for a team of twelve developers.
- Wrote a widely used internal library for cross-browser form validation.
- Built small interactive prototypes with Flash and early JavaScript libraries for advertising campaigns.
- Learned accessibility fundamentals while rebuilding a municipal website for a public client.
