Lars Hendriksson

Junior Data Analyst

lars.hendriksson@example.com · Aarhus, Denmark

SUMMARY

Data analyst with two years of experience in survey statistics and reporting. I enjoy regression, visualisation and explaining numbers to non-technical colleagues. Currently learning machine learning basics through online courses. Outside work I volunteer teaching spreadsheet skills to local community groups. I am a careful, curious analyst who enjoys clear charts and honest statistics.

SKILLS

Python, pandas, scikit-learn (introductory), R, SQL, Tableau, Excel, Linear regression, Hypothesis testing, Kubernetes, Terraform, CI/CD, Docker, AWS, Jenkins, Agile

EXPERIENCE

Junior Data Analyst, Jutland Market Research 2023 – Present

- Produce monthly survey reports and dashboards for retail clients, and added short plain-language summaries so that account managers could use the findings directly.
- Fit simple regression models to explain customer satisfaction scores, and checked model assumptions with residual plots before sharing anything with clients.
- Clean and merge panel data in pandas; automate recurring reports with scripts, and set up reusable scripts so the same report can be rebuilt each month in minutes.
- Attended a one-day Kubernetes workshop and I am familiar with Terraform and CI/CD concepts through our data team's wiki.
- Meet clients to clarify requirements and present findings in plain language.

Research Intern, Aarhus Social Science Institute 2022 – 2023

- Coded open-ended survey answers and ran descriptive statistics.
- Helped prepare figures for a published report.
- Learned R and Python for data cleaning during the internship.
- Supported a team of four researchers with data management.
- Presented a preliminary analysis of household budgets to a group of academics.

Student Assistant, Aarhus Nordic University 2020 – 2022

- Graded statistics assignments and held weekly exercise sessions.
- Maintained a shared dataset for a research group.
- Learned LaTeX and reproducible reporting with R Markdown.
- Created charts for a policy brief that was shared with local government.
- Learned good practice for data documentation and sharing.

EDUCATION

- MSc Statistics, Aarhus Nordic University (2020 – 2022)
- BSc Economics, Aarhus Nordic University (2017 – 2020)

LANGUAGES

Danish (native), English (C1)
