Lars Ostergaard-Weiss

Infrastructure Engineer

lars.ostergaard-weiss@example.org · Aarhus, Denmark

SUMMARY

Infrastructure engineer, five years of experience, mostly on AWS with CloudFormation and Helm. Quiet but thorough. I like small pull requests, good dashboards and sleeping through the night. Outside of work I maintain a small open-source tool for tidying unused AWS resources, and I like cycling to the office whenever the Danish weather allows.

SKILLS

AWS, CloudFormation, CDK, Helm, EKS, GitHub Actions, Docker, CloudWatch, Datadog, Python, Bash, IAM, Route 53

EXPERIENCE

Infrastructure Engineer, Fjordline Software 2021 – Present

- Own the AWS accounts for a SaaS product with 90 employees; every resource is defined in CloudFormation or CDK.
- Deploy workloads to EKS using Helm charts and GitHub Actions workflows with environment protection rules.
- Introduced Datadog monitors tied to service ownership, reducing unowned alerts to zero.
- Ran the migration from a single shared account to separate accounts per environment.
- Created a reusable template for new services covering load balancer, autoscaling, alarms and dashboards, now used by all teams.
- Rotated all long-lived access keys to short-lived roles via federation.
- Review pull requests from developers who change infrastructure, offering guidance on least privilege and sensible defaults.
- Schedule quarterly disaster recovery rehearsals and publish short summaries of what we learned and what we will change.

Junior DevOps Engineer, Kattegat Commerce 2019 – 2021

- Maintained build servers and moved nightly builds to hosted runners.
- Wrote Python scripts for AWS cost reports and unused-resource clean-up.
- Took part in the on-call rota with a senior colleague.
- Wrote runbooks for the five most common incidents and used them to train two new colleagues.
- Reduced hosted runner minutes by 35% with smarter caching and path filters.
- Participated in architecture reviews and helped choose managed services instead of self-hosted components where it reduced maintenance.

EDUCATION

- BSc Software Engineering, Aarhus School of Technology (2015 – 2019)

LANGUAGES

Danish (native), English (fluent), German (B1)

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
