Lucan Hargreave-Okafor

Creative Frontend Developer

lucan.hargreave@example.net · Bristol, United Kingdom

SUMMARY

Creative developer who sits between design and engineering. Eight years building interactive experiences: product configurators, data visualisations and motion-rich landing pages. I enjoy WebGL, canvas and getting animation to feel right at 60 frames per second. I write about creative coding on my blog and run a small monthly meetup where developers and designers share experiments. I like prototypes that feel alive.

SKILLS

JavaScript	Three.js	GSAP
WebGL	Canvas	React Three Fiber
D3	GLSL	Vite
Web Audio API	Performance profiling	TypeScript
Shaders	Motion design	Figma

EXPERIENCE

Period	Position	Responsibilities
2020 – Present	**Creative Frontend Developer** Severnside Interactive	• Built a 3D product configurator in Three.js that raised enquiries by 27%. • Profile and optimise animation frames to hold 60 fps on mid-range laptops. • Prototype ideas with designers in code before they reach sign-off. • Share reusable shader snippets and animation helpers across the studio's projects. • Estimate motion-heavy work with producers and flag when a visual idea needs a simpler fallback.
2016 – 2020	**Frontend Developer** Avonmouth Labs	• Produced interactive data stories for a news publisher with D3 and SVG. • Developed an in-browser audio visualiser using the Web Audio API. • Mentored two interns through their first public project. • Explored WebGL fallbacks so that experiences degrade gracefully on older phones. • Delivered conference talks about real-time graphics for non-specialist audiences.
2014 – 2016	**Junior Developer** Clifton Pixel Co	• Built banner ads and microsites with HTML5 canvas and CSS animations. • Learned version control and agile ceremonies while working alongside senior developers. • Tested campaign pages on dozens of screens and fixed alignment bugs. • Hand-coded HTML emails and optimised image assets to reduce banner sizes for ad networks.

		• Joined weekly code reviews and picked up good habits in naming and structure.

EDUCATION

2011 – 2014	BSc Creative Computing (final project: a generative music visualiser)	University of the West Downs
