Lukas Hartmannsdorf

Principal Penetration Tester

lukas.hartmannsdorf@example.net · Munich, Germany

SUMMARY

Offensive security specialist with fifteen years of experience breaking into networks, web applications and mobile apps for a living. I write reports that engineers actually read and I mentor juniors in red team tradecraft. I publish tooling and blog posts on attack techniques and speak regularly at industry conferences. I value honest reporting and constructive collaboration with defenders.

SKILLS

Network and web penetration testing	Active Directory attacks	Red teaming
Cobalt Strike	Burp Suite	Mobile app testing (Android, iOS)
Social engineering	Exploit development	Report writing
Purple team exercises		

EXPERIENCE

Period	Position	Responsibilities
2017 – Present	**Principal Penetration Tester** Eisenfeld Security	• Led more than 80 engagements for banks and manufacturers, including 12 full-scope red team operations. • Developed an internal Active Directory attack methodology now used by the whole 15-person team. • Coach junior testers and review every report before it reaches the client. • Presented findings to executive boards and translated technical risk into business impact. • Maintain a library of custom tools for lateral movement and detection evasion testing, shared with the blue team after each exercise. Advise clients on remediation roadmaps, prioritising fixes that remove whole classes of attack.
2012 – 2017	**Senior Security Consultant** Wallner & Partner IT	• Web and mobile application tests for insurance and automotive customers. • Discovered and responsibly disclosed several vulnerabilities in commercial software. • Created the firm's standard testing checklist for REST APIs. • Taught a university course on web security for two semesters. • Built a lab environment with intentionally vulnerable applications for training.
2009 – 2012	**Network Administrator** Kaltenbach Maschinenbau	• Managed firewalls, VPN access and Windows domain for a 300-person manufacturer. • Responded to a ransomware incident for the first time and supported the recovery team over a weekend. • Documented the network topology and wrote the first disaster recovery plan, tested with two full restore exercises. • Learned to write shell scripts and manage Linux servers, which proved useful for offensive work.

EDUCATION

2004 – 2009	Diplom Informatik	Technische Hochschule Isarland (fictional)
