CERTIFICATIONS

- Full-Stack JavaScript Bootcamp, Turia Code School
- English for Software Teams, B2 certificate

EDUCATION

- Grado en Ingeniería Informática, Universidad Politécnica del Levante (2020 – 2024)

SUMMARY

Junior developer with eighteen months of professional experience and a strong portfolio of side projects. I work with TypeScript on both sides of the stack and enjoy small teams where I can learn quickly and ship often. My goal is to grow into a role where I can contribute to architecture and learn from more experienced engineers.

EXPERIENCE

Junior Full-Stack Developer, Turia Software Studio — 2025 – Present

- Implement features across Next.js frontends and Express APIs for small business clients.
- Built a booking calendar with optimistic updates and server validation.
- Wrote Vitest component tests and fixed accessibility issues flagged in audits.
- Deploy previews on Vercel for client review.
- Contributed to a shared component library and added dark mode support.

Intern Developer, Levante Apps — 2024 – 2025

- Created an admin panel for an events app using React and Prisma.
- Paired with senior developers on bug fixes and code reviews.
- Wrote automated tests for form validation after a customer reported inconsistent behaviour.
- Completed a capstone project: a marketplace for local farmers' produce with payments and reviews.
- Documented the setup steps for each project so new teammates could run it in under fifteen minutes.

Freelance Web Developer, Self-employed — 2023 – 2024

- Built landing pages and small online shops for three local businesses using React and a headless CMS.
- Handled requirements, invoicing, hosting set-up and after-launch support on my own.
- Learned to estimate honestly and to say no to scope that did not fit the budget.
