Ngozi Whitlock-Ramanathan

UX Researcher and Designer

ngozi.whitlock@example.org · Birmingham, United Kingdom

SUMMARY

Researcher-designer working in healthcare and public services for nine years. I specialise in qualitative research with hard-to-reach users, service blueprints and plain-language content design. Evidence first, opinions second. I teach research methods to colleagues, volunteer reviewing charity websites for clarity and believe good services begin by listening carefully to the people who use them. I like cross-functional teams and short feedback loops.

SKILLS

Qualitative research, Contextual inquiry, Service design, Service blueprints, Content design, Surveys, Affinity mapping, Sketch, Figma, Accessibility audits, Stakeholder workshops, Thematic analysis, Research ethics, Participant recruitment, Report writing, Agile, Mixed methods

EXPERIENCE

Lead UX Researcher, Midlands Care Network 2019 – Present

- Conducted 90 interviews with patients and carers to reshape the appointment journey.
- Produced service blueprints adopted by three hospital trusts.
- Rewrote letters and web forms in plain language, reducing missed appointments by 11%.
- Manage a team of two researchers and a content designer.
- Present research insights to the executive board and track whether recommendations are implemented.

UX Designer, Severn Civic Digital 2015 – 2019

- Designed online forms for council tax and housing benefit services.
- Ran usability sessions with older adults and people using screen readers.
- Documented findings in short, shareable reports.
- Created a recruitment panel of 300 residents who take part in short studies throughout the year.
- Led a series of design sprints with frontline staff.

Research Assistant, University of Central Meadows 2013 – 2015

- Supported studies on digital inclusion.
- Learned participant recruitment, consent procedures and careful note-taking.
- Co-authored a paper on older adults and online public services.
- Transcribed focus groups and drew out themes about trust in health services.
- Learned statistical basics for survey analysis and presented clear charts to supervisors.

EDUCATION

- MSc Human-Computer Interaction (dissertation on older adults and digital health services), University of Central Meadows (2011 – 2013)
