Oluwaseun Babatunde-Fenn

Senior Web Developer

seun.babatunde@example.net · Lagos, Nigeria

SUMMARY

Web developer with eleven years of experience delivering mobile-first interfaces for banks and payment companies in low-bandwidth markets. I focus on resilience, progressive web apps and keeping interfaces usable on cheap Android phones. I am proud of products that people in under-served areas rely on daily, and I enjoy teaching teammates how to test on realistic networks and devices.

SKILLS

React, Preact, PWA, Service workers, TypeScript, Workbox, Styled Components, Webpack, Jest, Lighthouse, i18n, Offline-first design, Redux, Responsive layouts, Browser dev tools

EXPERIENCE

Senior Web Developer, Zuma Pay 2019 – Present

- Shipped a progressive web app that works offline for agents in rural areas; 200,000 active users.
- Cut payload size by 60% so key screens load in under three seconds on 3G.
- Standardised internationalisation for English, Hausa and Yoruba.
- Led a team of three developers and reviewed every release.
- Set up performance budgets and real-user monitoring so regressions on slow networks are visible within a day.

Web Developer, Harmattan Systems 2015 – 2019

- Built a loan application interface with React and Redux.
- Replaced a jQuery front end with component-based architecture.
- Tested on a device lab of twelve low-end phones.
- Introduced code reviews and pair debugging sessions, which reduced production incidents on the loan product.
- Wrote the team's guide for building forms that survive flaky connections.

Junior Developer, Ikoyi Web Works 2013 – 2015

- Produced responsive HTML and CSS templates from design mockups.
- Maintained templates for banking campaign pages and fixed rendering issues in older Android browsers.
- Helped migrate sites from table layouts to flexbox.
- Collaborated with a designer on icon sets, spacing rules and a colour palette for small screens.
- Presented progress to clients at weekly demos and recorded feedback in a shared tracker.

EDUCATION

- BSc Computer Engineering (final project: a community savings tracker), University of Ogun Coast (2008 – 2012)

LANGUAGES

English (fluent), Yoruba (native)
