Piotr Halloran

Lead UI Engineer

piotr.halloran@example.net · Wrocław, Poland

SUMMARY

Lead UI engineer with fifteen years across Angular and React. I own front-end architecture for a team of nine, balancing delivery speed with long-term maintainability. Strong believer in monorepos, strict typing and meaningful automated tests. Comfortable presenting trade-offs to product and executives. I value written decision records, clear ownership boundaries and sustainable pace. Previously organised a regional JavaScript conference attended by 400 people.

SKILLS

Angular 17	RxJS	NgRx
TypeScript	Nx monorepo	Micro-frontends
Module Federation	Karma	Jasmine
SCSS	Accessibility	Technical leadership
Code review	Performance budgets	Technical writing

EXPERIENCE

Period	Position	Responsibilities
2019 – Present	**Lead UI Engineer** Oderbridge Software	• Architected a micro-frontend platform with Module Federation serving five independent teams. • Reduced regression bugs by 45% after introducing strict TypeScript settings and contract tests. • Run weekly architecture reviews and hiring interviews for the front-end guild. • Upgraded the codebase from AngularJS to modern Angular across eighteen months without downtime. • Defined coding standards, lint rules and review checklists that new joiners can follow from day one.
2013 – 2019	**Senior Front-End Developer** Silesia Retail Systems	• Developed point-of-sale web interfaces in Angular and RxJS used in 300 stores. • Optimised large data grids to handle 50,000 rows with virtual scrolling. • Coordinated an offline-first mode using service workers. • Partnered with UX to build a shared form library that replaced four divergent implementations. • Trained twelve developers on RxJS patterns during internal workshops.
2010 – 2013	**Web Developer** Bernstein Interactive	• Built PHP-templated sites enhanced with jQuery and Backbone. • Handled cross-browser support for IE9 and wrote a small templating helper still used by the team. • Learned version control discipline and release tagging from a strict senior colleague. • Collected requirements from account managers and translated them into small, testable interface tickets.

		• Helped migrate hosting scripts and documented the manual release checklist for the team.

EDUCATION

2005 – 2010	MSc Software Engineering (thesis on component-based user interface frameworks)	Lower Silesian Technical University
