Priyanka Deshmukh

Staff Software Engineer

priyanka.deshmukh@example.com · Pune, India

SUMMARY

Staff-level engineer with 14 years in backend systems, eight of them building Go services for logistics marketplaces. I look after reliability of the critical path and help teams decide between simple and clever. I am happiest when a complex system becomes boring and predictable. I mentor engineers up to senior level, write the design reviews others copy, and enjoy hiring for potential, not pedigree.

SKILLS

Go, gRPC, Kafka, PostgreSQL, Cassandra, Domain events, Load testing, SLO design, Tracing, Rust (basic), Python, Technical writing, Technical leadership, Architecture reviews, Hiring

EXPERIENCE

Staff Software Engineer, Sahyadri Freight Exchange 2018 – Present

- Architected the dispatch and pricing core in Go handling 9 million shipments a year, partnering with operations leads and finance to translate commercial rules into explicit domain models, and publishing runbooks that new engineers could follow on their first on-call week.
- Defined SLOs and error budgets; incidents with customer impact dropped 70% in two years.
- Led a Cassandra-to-PostgreSQL consolidation that saved roughly 25% of database spend.
- Run an internal Go guild with monthly talks.
- Introduced a design review template and decision log, now used by more than forty engineers.

Senior Engineer, Deccan Retail Systems 2014 – 2018

- Developed order management services in Java and Python, a period when the company grew threefold and I helped the team keep delivery predictable through clear ownership and small releases.
- Built a carrier integration layer used by 30 partners.
- Led the rewrite of the rating engine that doubled throughput in peak season.
- Taught internal workshops on SQL tuning and transaction isolation.
- Trained a new team of five engineers during a reorganisation.

Software Engineer, Konkan Infotech 2012 – 2014

- Worked on telecom provisioning tools in Java.
- Wrote stored procedures and batch jobs.
- Delivered on-site support for customers during go-lives and negotiated scope with business stakeholders.
- Created monitoring scripts that were adopted across the department.
- Built nightly reconciliation jobs and wrote the runbook still used by the support team.

EDUCATION

- BTech Computer Engineering, Western Ghats Institute of Technology (2008 – 2012)

LANGUAGES

English (fluent), Marathi (native), Hindi (fluent)

CERTIFICATIONS

- Certified Cloud Practitioner (foundational)
