- MBA (Product Management), Chola Institute of Management (fictional) (2019 – 2021)
- BE Electronics, Madras Coastal Engineering College (fictional) (2015 – 2019)

SUMMARY

Growth-focused product manager who has spent four years working on consumer apps. I run experiments quickly, read the data carefully and care about retention more than vanity metrics. I enjoy mentoring new joiners and am looking for a role with wider product ownership and international exposure. I am at my best when a vague problem needs a hypothesis, a fast test and a clear decision.

EXPERIENCE

Product Manager, Growth, Tamarind Learning App 2022 – Present

- Own activation and retention for a learning app with 2.4 million monthly active users.
- Ran 60+ experiments in two years; a redesigned first lesson improved day-7 retention by 9 points.
- Wrote SQL to build cohort dashboards and trained the team to use them.
- Align engineering, design and content teams on a shared growth backlog.
- Collaborate with data science to personalise lesson recommendations; completion rate rose by 12%. Run weekly experiment reviews open to the whole company and keep a public log of results.

Associate Product Manager, Quickloom Commerce 2021 – 2022

- Documented requirements for a wishlist feature and managed its launch.
- Interviewed 25 shoppers and synthesised insights for the roadmap.
- Learned to run A/B tests and interpret statistical significance with the data team.
- Presented final-quarter learnings to the head of product.
- Supported launch coordination with marketing and customer care teams.

Business Analyst Intern, Marina Fintech Solutions 2018 – 2019

- Analysed customer support tickets and categorised the top twenty complaints for the product team.
- Built Excel dashboards on loan application drop-offs used in weekly reviews.
- Shadowed product managers in discovery interviews and sprint ceremonies.
