Priyanka Venkataraghavan

Cloud Engineer

priyanka.venkataraghavan@example.com · Bengaluru, India

SUMMARY

Cloud engineer working on Azure for seven years. I design landing zones, write Bicep, and look after AKS workloads for a banking client. I like clear documentation, tagging standards and anything that makes audits easier. I enjoy working with security and finance colleagues to balance control and speed, and I volunteer as a mentor in a women-in-technology programme that supports early-career engineers in Bengaluru.

SKILLS

Azure, AKS, Bicep, ARM templates, Azure DevOps Pipelines, Azure Policy, Defender for Cloud, PowerShell, Azure Monitor, Log Analytics, Docker, Linux

EXPERIENCE

Cloud Engineer, Sagarmatha Bank Technology 2020 – Present

- Built a multi-subscription landing zone with management groups, policy guardrails and hub-and-spoke networking, all in Bicep.
- Operate AKS clusters hosting 35 workloads; handled version upgrades with no customer-visible downtime.
- Authored Azure DevOps release pipelines with approval gates, vulnerability scanning and automated smoke tests.
- Reduced idle cloud cost by 22% with schedule-based scaling and right-sizing reports.
- Implemented private endpoints, managed identities and key vault integration across production workloads.
- Prepared quarterly cost and compliance reports for the risk committee, based on policy compliance data.
- Run monthly game-day exercises with application owners to rehearse failover between regions and refine recovery runbooks.
- Coordinate with the security operations centre on alert tuning so only actionable findings reach the on-call engineer.

Associate Cloud Engineer, Lotus Digital Consulting 2017 – 2020

- Migrated 60 virtual machines from a private data centre to Azure IaaS.
- Scripted resource deployment with ARM templates and PowerShell.
- Supported three client teams during weekend cutovers.
- Documented a repeatable migration approach, including dependency mapping and rollback plans.
- Trained the support team on Azure Monitor alerts and runbook automation.
- Prepared training material and hands-on labs that onboarded twelve new consultants to the Azure estate within a quarter.

EDUCATION

- B.Tech Information Technology, Deccan Institute of Engineering (2013 – 2017)

LANGUAGES

English (fluent), Tamil (native), Hindi (fluent)

CERTIFICATIONS

- Microsoft Azure Administrator Associate

- Microsoft Azure DevOps Engineer Expert
