Rajesh Subramaniam

Senior Oracle Database Administrator

rajesh.subramaniam@example.com · Hyderabad, India

SUMMARY

Oracle DBA with sixteen years of experience running mission-critical databases in banking. I specialise in RAC, Data Guard and performance tuning, and I write careful runbooks. Calm during incidents. I am methodical, document every change and enjoy training junior administrators. I work well with application teams, auditors and vendors, and I always test recovery procedures before I trust them.

SKILLS

Oracle 19c	RAC	Data Guard
RMAN	Exadata	AWR analysis
SQL tuning	PL/SQL	Shell scripting
Backup and recovery	Patching	Automation

EXPERIENCE

Period	Position	Responsibilities
2014 – Present	**Senior DBA** Charminar Bank Technology	• Administer 120 Oracle databases across RAC clusters with 99.99% availability, and documented the failover steps so that any DBA on call could carry them out confidently. • Implemented Data Guard standby with tested switchover in under four minutes, and shared the tuning notes with the application team to prevent the same problem returning. • Tuned a settlement batch from 5 hours to 80 minutes using AWR and SQL plan baselines, with regular reports to risk and audit teams about patch status and exceptions. • Lead quarterly patching windows and disaster recovery drills. • Trained and mentored five junior DBAs in RAC administration and incident handling.
2009 – 2014	**Oracle DBA** Deccan Insurance Group	• Managed backups with RMAN and validated restores monthly. • Upgraded databases from 10g to 11g. • Planned and executed a data centre move with only 20 minutes of downtime. • Implemented database auditing for regulatory requirements. • Led proofs of concept for storage upgrades and presented cost comparisons to management.
2007 – 2009	**Junior DBA** Godavari Software	• Provided daily monitoring and user administration. • Learned Oracle administration from senior colleagues and prepared daily health check reports. • Maintained user accounts and storage monitoring. • Participated in on-call rotation and resolved tablespace, locking and backup incidents. • Wrote shell scripts that automated routine checks and reporting.

EDUCATION

2003 – 2007	BTech Computer Science	Nizam Institute of Technology
