Ravindra Chitnis

Junior Python Developer

CONTACT

ravindra.chitnis@example.net
Pune, India

SKILLS

- Python
- Flask
- SQLAlchemy
- MySQL
- Redis
- pytest
- REST
- Git
- Linux
- Postman
- Jira
- MySQL Workbench
- Swagger

LANGUAGES

- English (fluent)
- Hindi (native)
- Marathi (native)

CERTIFICATIONS

- Python Fundamentals Certificate, Pune Tech Institute
- Introduction to SQL Optimisation, online course

EDUCATION

- BTech Information Technology, Pune Institute of Engineering Studies (2018 – 2022)

SUMMARY

Junior developer with two years of experience writing Flask services and internal tools. Fast learner, comfortable reading other people's code and writing tests. Looking to grow into larger distributed systems. Outside work I contribute documentation fixes to open-source Python libraries and practise algorithm problems with colleagues every Friday.

EXPERIENCE

Software Developer, Sahyadri Insurance Services 2023 – Present

- Develop and maintain Flask APIs for policy quotes used by around 200 branch agents.
- Added Redis caching to the premium calculator, reducing response time from 2 s to 400 ms.
- Write unit and integration tests with pytest; raised coverage of the claims module from 35% to 78%.
- Fix production defects triaged by the support team.
- Pair weekly with a senior engineer, who reviews every change and teaches me about database design and API versioning.

Intern, Software Engineering, Deccan Datacraft 2022 – 2023

- Built a Python script that reconciled customer exports from two systems.
- Helped write documentation and API examples for the partner integration team.
- Wrote a Python script that reconciled customer exports from two legacy systems, reducing manual spreadsheet work by about eight hours a week.
- Documented each endpoint with examples and error codes, making it easier for the mobile team to integrate without asking questions.
- Participated in code review and received feedback on naming and structure.

Trainee Developer (part-time), Hadapsar Web Solutions 2021 – 2022

- Built small Flask pages and fixed CSS issues during the final year of university.
- Learned Git workflows, pull requests and basic debugging with the team lead.
- Prepared test data and wrote simple SQL queries for the QA tester.
- Joined daily stand-ups and learned to estimate work in small, testable slices.
