Ruairi Fennelly

Junior Backend Engineer

ruairi.fennelly@example.net · Cork, Ireland

SUMMARY

Junior engineer, two years into my first role, working in Go. Keen learner who enjoys reading standard library code. Looking to grow towards system design and performance work. I am active in the local Go user group, where I have given a lightning talk, and I am currently working through a book on concurrency to deepen my fundamentals.

SKILLS

Go, net/http, PostgreSQL, Gin, Docker, Git, Unit testing, JSON APIs, Linux, SQL, Debugging, Agile (Scrum), Technical documentation

EXPERIENCE

Junior Backend Engineer, Harbourview Retail Tech 2024 – Present

- Maintain inventory APIs in Go used by 120 shops, and I now review small changes from newer colleagues too, which has taught me how much clear naming and good commit messages matter in a shared codebase.
- Fixed a goroutine leak that had caused weekly restarts.
- Wrote table-driven tests that lifted coverage from 41% to 78%.
- Pair with a senior colleague on code reviews.
- Improved error messages and request validation, which cut support tickets about failed stock updates by a quarter.

Software Intern, Corkline Analytics 2023 – 2024

- Built a small CSV import tool in Go, learning to estimate honestly, ask for help early and present short demos to the shop managers who used the tools every day.
- Helped write SQL reports for the finance team.
- Wrote a dashboard query set that finance still uses for weekly stock reports, saving about two hours of manual work.
- Documented the import tool so that colleagues could run it without my help.

Part-time Support Technician, Cork Computer Repairs 2021 – 2023

- Diagnosed hardware and software faults for home customers during university studies.
- Kept an inventory spreadsheet and ordered parts for repairs.
- Explained technical problems to non-technical customers in plain language.
- Developed patience and communication skills dealing with anxious customers and unclear problem descriptions.
- Used the job to save for my degree and learn to prioritise tasks.

EDUCATION

- BSc Software Development, Munster Technical University (2020 – 2024)

LANGUAGES

English (native), Irish (B2)
