Sabine Oltmanns

Software Engineer, .NET

sabine.oltmanns@example.com · Cologne, Germany

SUMMARY

Mid-level .NET developer with seven years in healthcare IT. I build HL7 and FHIR integrations as well as web APIs. I care about data privacy, careful error handling and readable code. Data protection and clinical safety guide my engineering choices. I enjoy working with clinicians, translating their needs into reliable interfaces, and I like debugging unusual message flows.

SKILLS

C#, .NET 8, ASP.NET Core, FHIR, HL7, SQL Server, Entity Framework, xUnit, Azure DevOps, Docker, WCF (legacy), Serilog, Data protection (GDPR), Clinical safety, Incident response

EXPERIENCE

Software Engineer, Rheinklinik Informatik 2021 – Present

- Develop FHIR APIs connecting 12 hospital systems, in close cooperation with clinicians, privacy officers and vendors, so that every interface had documented message examples and a clear owner on both sides.
- Reworked error handling and Serilog logging, shortening troubleshooting from hours to minutes.
- Wrote migration scripts for patient master data.
- Apps are deployed to containers by the infrastructure group via Azure DevOps.
- Joined the incident rota and wrote post-incident reports that led to better retry logic for messages.

Developer, Domstadt Medizinsoftware 2018 – 2021

- Maintained WCF services and HL7 interfaces, where I also trained colleagues in careful error handling, data validation and how to read integration logs without panic.
- Ported modules to .NET Core.
- Held workshops on unit testing.
- Implemented role-based access and audit logging to satisfy hospital privacy officers.
- Reduced interface message failures by 65% through validation and clearer error responses.

Junior Developer, Kölsch Digital 2017 – 2018

- Built internal web forms in ASP.NET MVC.
- Worked with nurses to design a handover summary screen that became the most-used feature in the product.
- Learned HL7 messaging on the job.
- Built internal web forms and learned unit testing and database design.
- Supported colleagues in the radiology department with small tooling requests.

EDUCATION

- BSc Medical Informatics, Rhenish University of Applied Sciences (2012 – 2017)

LANGUAGES

German (native), English (C1), Turkish (A2)

CERTIFICATIONS

- HL7 FHIR fundamentals certificate
