Saoirse Callanan-Dube

Mobile Test Automation Engineer

saoirse.callanan@example.com · Cork, Ireland

SUMMARY

Mobile-focused automation engineer with five years testing iOS and Android apps. I build device-farm based suites, investigate flaky UI tests and care about performance on older handsets. I mentor junior testers, publish short write-ups on device quirks, and enjoy hunting down intermittent issues that only appear on one phone model. I like small teams and honest retrospectives.

SKILLS

Appium, Kotlin, Swift basics, Espresso, XCUITest, BrowserStack-style device clouds, Fastlane, Bitrise, Charles Proxy, Detox, Crash analytics, Crash log analysis, Performance profiling, Bug triage, Test planning, Agile, Git

EXPERIENCE

Mobile Test Automation Engineer, Lee Valley Apps 2021 – Present

- Created an Appium suite running on forty real devices nightly.
- Wrote Espresso tests alongside Android developers, covering login and payment screens.
- Diagnosed a memory leak that caused crashes on older phones, fixed in the next release.
- Ran release verification across beta tracks.
- Maintain a device matrix based on analytics so the lab always covers the models customers really use.

QA Engineer, Shandon Games 2019 – 2021

- Tested game builds on a range of Android devices and reported compatibility issues.
- Automated onboarding checks with Appium and Python.
- Tracked crash-free session rate and flagged regressions to the team.
- Built tooling to collect logs and screenshots automatically after each failed UI test.
- Coordinated beta tester feedback and turned it into reproducible bug reports.

Support and Test Assistant, Kinsale Mobile Studio 2018 – 2019

- Tested early builds of a tourism app on personal and loaned phones during university summers.
- Documented issues with screenshots and short screen recordings for developers.
- Helped prepare store listings and release notes.
- Shared findings in weekly demos and helped designers understand how interface choices affect low-end phones.
- Learned to read crash logs from both Android and iOS devices.

EDUCATION

- BSc Computing (final project: an automated mobile app testing tool), Munster Technological Institute (2015 – 2019)

LANGUAGES

English (native), Irish (B2)

CERTIFICATIONS

- Mobile testing certificate course
