Siobhán Ní Bhriain

Security Operations Analyst

siobhan.nibhriain@example.org · Cork, Ireland

SUMMARY

Junior SOC analyst, two years into a security career after a degree in cybersecurity. I enjoy the detective side of incident triage and am steadily learning to write detections instead of just following them. I keep a home lab where I practise log analysis and write up small investigations to sharpen my reporting skills. I am looking for a team that teaches threat hunting. Calm under pressure, I write clear handover notes and enjoy explaining incidents to non-technical colleagues.

SKILLS

Alert triage, Microsoft Sentinel, KQL queries, Phishing analysis, MITRE ATT&CK, Wireshark, Windows event logs, Incident documentation, Basic Python

EXPERIENCE

Security Operations Analyst, Corriboy Managed Services 2024 – Present

- Triage around 60 alerts per shift in Microsoft Sentinel and escalate genuine incidents with clear timelines.
- Wrote 15 KQL detection rules for credential stuffing and impossible-travel sign-ins.
- Analysed reported phishing emails and cut average response time to 25 minutes.
- Shadow senior analysts during incident calls and prepare post-incident summaries for customers.
- Maintain a shared knowledge base of triage steps for common alert types, used by the whole shift. Joined a capture-the-flag team and placed in the top ten in two regional competitions.

Security Intern, Dunmore Credit Union 2023 – 2024

- Helped review firewall logs and maintain the vulnerability scan schedule.
- Documented the account recovery process and flagged two weaknesses to the IT manager.
- Wrote a short guide on spotting business email compromise, circulated to all branch staff.
- Assisted external auditors by gathering access logs and screenshots on request.
- Learned to read firewall and proxy logs with guidance from the IT manager.

Part-time IT Assistant, Cork Community Library Network 2021 – 2023

- Supported staff and public computers, handled password resets and removed malware from shared machines.
- Set up automatic updates and basic backups, and wrote a one-page security guide for volunteers.
- Studied full-time alongside this role and completed a final-year project on phishing awareness.

EDUCATION

- BSc Cybersecurity and Digital Forensics, Munster Technological College (fictional) (2019 – 2023)

LANGUAGES

English (native), Irish (fluent)
