Tomasz Wierzbicki

DevOps Engineer

tomasz.wierzbicki@example.net · Wroclaw, Poland

SUMMARY

DevOps engineer, nine years in on-premises and hybrid environments. I automate whatever a team does twice. Strongest with Jenkins, Ansible and OpenShift; comfortable reading other people's legacy scripts and gradually replacing them with something testable. My preference is for simple, observable automation that new colleagues can understand on their first day, and I regularly present lunch-and-learn sessions on shell scripting, containers and secure defaults for the wider IT department.

SKILLS

Jenkins, Ansible, OpenShift, Docker, Nexus, SonarQube, Bash, Python, Groovy, Vault, RHEL, Zabbix, Git

EXPERIENCE

DevOps Engineer, Vistula Insurance Group 2019 – Present

- Operate the OpenShift platform (three clusters, about 70 namespaces) and onboard development teams.
- Maintain 120 Jenkins pipelines; introduced pipeline-as-code and cut average build time by a third.
- Wrote Ansible roles for hardening and patching 300 RHEL hosts, passing two external audits without findings.
- Integrated HashiCorp Vault for secrets, removing credentials from repositories.
- Created a shared base image catalogue, patched monthly, which removed dozens of vulnerable images from production.
- Defined naming and tagging conventions for projects and routes so billing and ownership are always clear.

Build and Release Engineer, Odra Telecom Solutions 2015 – 2019

- Managed release calendars for a billing platform, with manual deployments gradually replaced by scripted ones.
- Set up Nexus and SonarQube and enforced quality gates before artefacts could be promoted.
- Trained developers on Git branching and code review.
- Reduced release windows from four hours to forty minutes by scripting database migration checks and smoke tests.
- Maintained a change log that auditors praised as the clearest they had seen.

System Administrator, Silesia Retail Sp. z o.o. 2012 – 2015

- Administered Linux servers, Apache and Tomcat stacks.
- Wrote Bash tooling for backups and log rotation.
- Learned to monitor everything with Zabbix and to document alerts properly.

EDUCATION

- MSc Computer Science, Wroclaw University of Applied Technology (2010 – 2012)

LANGUAGES

Polish (native), English (C1), German (A2)

CERTIFICATIONS

- Red Hat Certified Engineer
